INVESTMENT HIGHLIGHTS

- 100% acquisition of Green Ways S.r.l. completed — full control of proprietary cleantech IP
- 12+ international patent families, with 18-20 years of remaining protection
- Pilot project with RFI (Italy's national rail operator) under a Memorandum of Understanding
- Leadership team includes former CEOs of GME and RFI
- Dual revenue base: telecom cashflow (Oktacom) + cleantech growth pipeline
- First-mover advantage in railway-integrated renewable energy
- Supported by European green-energy regulatory tailwinds

PROPRIETARY TECHNOLOGY

KimaSOL

KimaSolRing

NYRA

Gevy

SMOX

Integrated photovoltaic systems engineered for railway networks, highways and linear infrastructure — designed to generate renewable energy from assets that already exist.
